

Corrections and Community Supervision

2014 Inmate Releases

Three Year Post-Release Follow-Up

2014 Inmate Releases: Three Year Post Release Follow-up

Return-to-custody data are presented for inmates released from the New York State Department of Corrections and Community Supervision (DOCCS) in 2014. This includes inmates who were released from parole program facilities¹ as well as those released from correctional facilities.

Return rates are based on a three-year follow-up period and are analyzed relative to several demographic and legal history characteristics. Return rates among the 2014 release cohort are compared to those found for an aggregated release cohort covering 1985 to 2014. Trends in rates of return among the annual release cohorts since 1985 are also presented.

¹ These alternative treatment program facilities include the Willard Drug Treatment Campus facility and the Edgecombe Residential Treatment facility. Technical violators began participating in a 90-day alternative drug treatment program at Willard in November 2007 and in a separate 30-day alternative drug treatment program at Edgecombe in December 2008 (which was later extended to a 45-day program in April 2010). Both parolees and inmates can be housed in these facilities, but only the inmates are included in this report.

EXECUTIVE SUMMARY

Return Rates. Among the 21,816 inmates released in 2014, there were 9,318 (43%) offenders who returned to DOCCS' custody within three years, including 10% recommitted with new felony convictions and 33% returned for parole violations. Since the 1996 cohort, the total return rate has been fairly stable at approximately 40%, with increasing violation rates and decreasing new conviction rates (see **Table 2**, p.3 and **Figure 2**, p.4).

Release Type. Offenders released by a decision of the Board of Parole returned at a higher rate (53%) than offenders released at their conditional release dates (39%). Offenders released at the maximum expiration of their sentence, who can only return for a new felony conviction because they are not subject to return for parole violations, had a return rate of 19% (see **Table 2**, p.3 and **Appendix A**, pp. 37-39).

Time to Return. Of the 9,318 offenders returned to custody, eighty-four percent returned within the first 24 months after their release (see **Table 3**, p.5). Overall, the median time to return was 12 months. The median time to return was 21 months for new commitments and 10 months for parole violators. The median time to return has decreased since 1985 releases (see **Figure 3**, p.6). This has been primarily due to a decrease in the median time to return among parole violators.

Gender. Women had a much lower rate of return (31%) than men (44%). The difference in female and male return rates was evident for both new convictions (5% vs. 10%) and parole violation returns (26% vs. 34%) (see **Table 4**, p.7 and **Figures 4.1** and **4.2**, p.8).

Release Crime. The return rate of VFO's was 45% and the return rate of "Property and Other Offenders" was 43%. Individual crimes with the highest return rates included Burglary 2nd (55%), Robbery 2nd (54%), Other VFO Sex Offenses (52%), Burglary 3rd (51%), and Other Violent Felony (51%). Individual crimes with the lowest return rates included Murder (13%), Criminally Negligent Homicide (13%), and Manslaughter 2nd (21%) (see **Table 5**, p.10).

Readmission Crime. Twenty-nine percent of the 2014 releases returned with new felony convictions committed drug offenses, 29% were returned for property and other offenses, 29% were convicted of violent felony offenses, and 12% were convicted of other coercive offenses (see **Table 6**, p.14).

Age. Younger offenders returned to DOCCS' custody at a higher rate than older offenders. Over half (57%) of the offenders released in 2014 who were under 21 years old returned, while 42% of the offenders 21 years of age or older returned (see **Table 7.1**, p.16).

Criminal History. The return rate increased as the number of prior felony convictions increased. Among the 2014 releases, 39% of offenders with no prior conviction returned within three years, while just under half (48%) of the releases with four or more prior felony convictions returned (see **Table 9.2**, p.21).

First vs. Previous Releases. Offenders who had no prior releases on their sentence were less likely to return (37%) than offenders previously released and returned (52%) (see **Table 10**, p.22).

Region. Among the 2014 releases, offenders committed from Upstate Urban counties were more likely to return (51%) than offenders from other Upstate counties in New York State (46%), Suburban New York City (41%), or New York City (37%) (see **Table 11**, p. 26).

Veterans. Among the 2014 releases, offenders identified as verified veterans returned to prison at lower rates (35%) than nonveterans (43%) (see **Table 13**, p. 31).

COMPAS Supervision Level . Return rates varied for offenders released to Community Supervision and supervised at different supervision levels. Those most intensively supervised, at Level 1, had the highest return rate (60%), followed by those supervised at Level 2 (53%), Level 3 (40%), and Level 4 (19%) (see **Table 15**, p 33).

SECTION ONE: RELEASES AND RETURNS

The following report presents return-to-custody information on a cohort of inmates released from facilities of the New York State Department of Corrections and Community Supervision (DOCCS) in 2014.² Each offender was followed for three years after release. Return-to-custody data for the 2014 cohort is compared with earlier annual cohorts, beginning with 1985, as well as a cumulative cohort covering 1985-2014 releases. The return rates by several demographic and legal history variables are assessed. Finally, a partial follow-up analysis is presented for 2015 and 2016 releases.

Description of the Release Cohorts

There are several types of releases from DOCCS' facilities. For example, offenders may be temporarily released to a mental health facility, non-citizen offenders may be deported, offenders may be paroled or they may complete their sentence. As in past reports, this follow-up study includes only the sanctioned release or discharge of an inmate to the community due to:

- a) the expiration of a sentence with no requirement of supervision in the community;
- b) the inmate's release by authority of the Board of Parole;
- c) the inmate's conditional release, which is required by statute after the inmate has served his or her maximum or determinate sentence less any earned good time credits.

The release which triggers inclusion in the follow-up is not necessarily the first time the inmate was released from DOCCS' custody while serving the current sentence. The 2014 cohort includes some offenders who were released to parole supervision prior to 2014, but who then returned to DOCCS as parole violators before their re-release during 2014.³

Returns to New York State DOCCS' Custody

Although there are many ways to measure recidivism (e.g., re-arrest, re-conviction, and re-incarceration), this study defines recidivism as a return to DOCCS' custody as an inmate. Once an inmate is given a sanctioned release to the community, there are two ways that he or she can be readmitted to DOCCS' custody. A *New Court Commitment* returns to DOCCS' custody after receiving a new felony conviction and a new sentence. A *Returned Parole Violator* (RPV) is returned to DOCCS' custody to continue serving time on a remaining sentence after having seriously violated the conditions of post-release community supervision or parole supervision.⁴

Return rates are related to release type; parolees and conditional releases remain under community

² In April 2011, the Department of Correctional Services and the Division of Parole merged to become the Department of Corrections and Community Supervision (DOCCS).

³ Nine hundred sixty-one of these re-released offenders had previously returned to custody to participate in an alternative treatment program, either the 90-day program at the Willard Drug Treatment Campus or the 45-day program at Edgecombe. These returned parole violators had been given a time assessment by an Administrative Law Judge, but served a shorter amount of time (90 or 45 days) and were re-released after successfully completing the program to which they were assigned.

⁴ New York currently has a mixed sentencing structure. Over half of the 2014 releases followed for this report (58%) were sentenced under New York's determinate sentencing policy, serving 6/7 of the sentence and then serving imposed post-release community supervision. Offenders who received indeterminate sentencing serve some portion of their sentence in prison and then remain under parole supervision until the maximum expiration of their sentence. For more detail, see Article 70, Sentences of Imprisonment, New York State Penal Law.

supervision until the maximum expiration of their incarceration and post-release supervision sentences and therefore may be returned to DOCCS' custody for violating the rules of parole supervision as well as for a new felony conviction. Offenders who complete their maximum sentence, however, are not under parole supervision after their release, and can only return for committing a new felony offense.

The 2014 Release Cohort

As shown in **Table 1**, there were 21,816 inmates who were released from DOCCS during calendar year 2014. Of these, 8,997 (41%) were released to parole supervision as a result of an action by the Board of Parole,⁵ 10,567 (48%) were released to parole supervision on their conditional release date, and 2,252 (10%) were released after serving the maximum time on their sentence.

**Table 1
2014 Releases: Returns to Custody by Type of Release**

RELEASE TYPE	TOTAL RELEASES		RETURNS		NO RETURN	
			#	%	#	%
TOTAL	21,816	100.0%	9,318	42.7%	12,498	57.3%
PAROLE	8,997	41.2%	4,725	52.5%	4,272	47.5%
CONDITIONAL RELEASE	10,567	48.4%	4,156	39.3%	6,411	60.7%
MAXIMUM EXPIRATION	2,252	10.3%	437	19.4%	1,815	80.6%

Overall, 43% (9,318) of the 2014 releases were recommitted to DOCCS within three years of release; the return rate for the 2014 cohort is similar to the rate recorded for the 2013 releases. Since the 1996 cohort, the total return rate has been stable at approximately 40% (see **Figure 2** and **Appendix A**). Among the 2014 releases, 19% of the maximum expiration releases returned to DOCCS' custody within three years, compared to 39% of the conditional releases and 53% of the paroled offenders. This relationship has been consistent since the release cohort of 1999. Offenders released due to the maximum expiration of their sentence return at a lower rate because they are not subject to return for rule violations.

⁵ Besides offenders who were first-released by decision of the Board of Parole after serving their minimum sentence, included in these releases are offenders who were re-released back to Community Supervision after participating in an alternative drug treatment program as a returned parole violator as well as offenders re-released to post-release supervision whose release date was determined by an Administrative Law Judge.

SECTION TWO: RETURN RATES BY RELEASE TYPE AND READMISSION TYPE

Table 2 presents return rates by readmission type for the 2014 releases and for the cumulative release cohort of 1985-2014 releases (data for individual years are provided in **Appendix A**). Within three years of release, 33% of the 2014 releases were returned for rule violations and 10% returned with new felony convictions.

The percentage of the cohort released by action of the Board of Parole has decreased over time; among the 2014 releases, 41% were released by the Board, compared to 63% of the combined 1985-2014 cohort.⁶ Among both cohorts, paroled and conditionally released offenders were more likely to be returned for rule violations than for new felony convictions. Forty-four percent of the offenders released by the Parole Board during 2014 were returned for rule violations within three years and 9% returned for new felonies. Similarly, among the 2014 conditional releases, 31% were returned as parole violators, while 8% were returned for new crimes. The return rate for rule violations is higher among parole releases than among conditional releases. This is because most conditional releases are first releases whereas the majority of parole releases are not⁷, and offenders who had no prior releases on their sentence (first releases) tend to have a lower recidivism rate than those who had prior releases.

Table 2
Returns for New Felony Offenses and For Violations of Parole:
Inmates Released in 2014 and 1985-2014

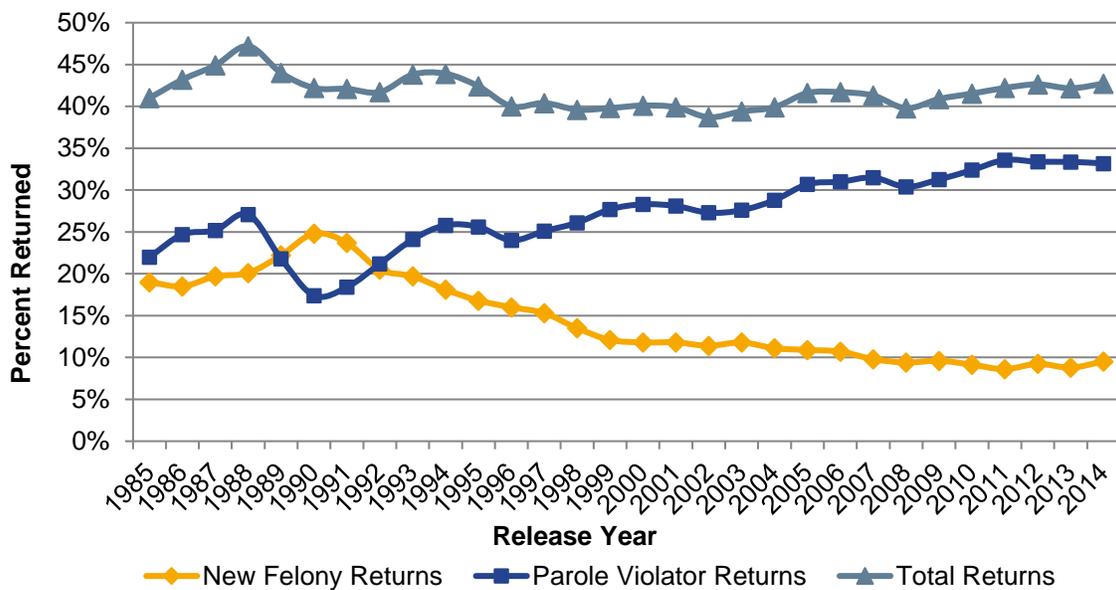

RELEASE TYPE AND RELEASE COHORT	TOTAL RELEASED		TOTAL RETURNED	RETURNED: NEW COMMITMENT	RETURNED: PAROLE VIOLATION
	#	%			
2014 RELEASES	21,816	100.0%	9,318	2,079	7,239
% (return/release)	100.0%		42.7%	9.5%	33.2%
PAROLE	8,997	41.2%	4,725	786	3,939
% (return/release)	100.0%		52.5%	8.7%	43.8%
CONDITIONAL RELEASE	10,567	48.4%	4,156	856	3,300
% (return/release)	100.0%		39.3%	8.1%	31.2%
MAXIMUM EXPIRATION	2,252	10.3%	437	437	(Not Applicable)
% (return/release)	100.0%		19.4%	19.4%	
1985-2014 RELEASES	709,404	100.0%	294,760	100,235	194,525
% (return/release)	100.0%		41.6%	14.1%	27.4%
PAROLE	448,620	63.2%	199,116	63,834	135,282
% (return/release)	100.0%		44.4%	14.2%	30.2%
CONDITIONAL RELEASE	206,715	29.1%	83,150	23,907	59,243
% (return/release)	100.0%		40.2%	11.6%	28.7%
MAXIMUM EXPIRATION	54,069	7.6%	12,494	12,494	(Not Applicable)
% (return/release)	100.0%		23.1%	23.1%	

⁶ Inmates who received determinate sentencing may be first-released on CR date or ME date. Since determinate sentencing was introduced for second violent felony offenders in 1995, first violent felony offenders in 1998, and drug offenders in 2005, the number of conditional releases has increased.

⁷ For the 2014 release cohort, 96% of conditional releases were first releases on the sentence. Among parole releases, only 33% were first releases and 67% had prior releases on their sentence. By restricting the analysis to first releases only, the return rate for rule violations was higher among conditional releases (31%) than parole releases (26%). (See Section Ten for details).

As shown in **Figure 2**, since the 1996 cohort, the total return rate has been fairly stable at approximately 40%, with increasing violation rates and decreasing new conviction rates (see **Appendix A**). The total return rate for the 2014 cohort was slightly higher than the rate for the 2013 cohort (43% versus 42%, respectively). Since 1990, violator return rates have generally increased, while new commitment rates have fallen. The lowest new commitment return rate (8.6%) occurred among 2011 releases; but the rate for the 2014 release cohort (9.5%) increased slightly from that of the 2013 release cohort (8.8%). Among the 2014 cohort, technical parole violations accounted for 78% of all initial returns within three years (7,239 out of 9,318).

Figure 2
Three-Year Return Rates by Return Type: 1985-2014

SECTION THREE: TIME TO RETURN

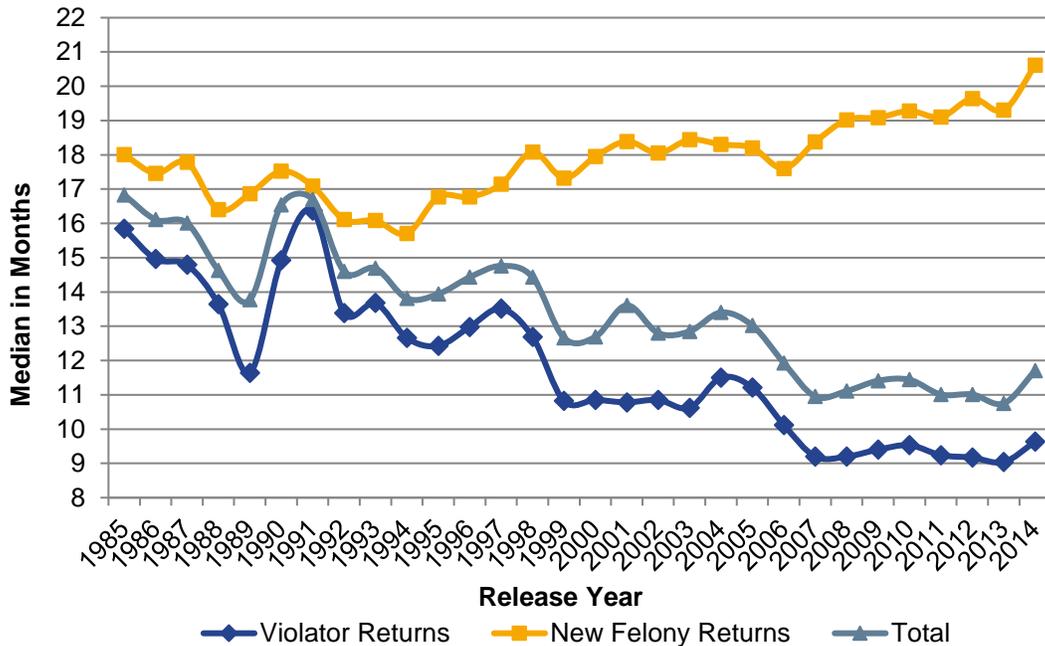

Table 3 presents the number of months from release to readmission for the 2014 releases that returned to DOCCS' custody. The median time-to-return for the 2014 cohort was 11.7 months. This means 50% of offenders returned to prison within twelve months of release. Of all 2014 releases returned to DOCCS' custody within three years, 84% were returned within 24 months of their release. Parole violators returned more quickly (9.6-month median) than releases who returned as new commitments (20.6-month median).

Table 3
Returns to Custody by Time to Return and Type of Return:
Inmates Released in 2014 and 1985-2014

TIME BETWEEN RELEASE AND RETURN	TYPE OF RETURN					
	TOTAL RETURNED		RETURNED: NEW COMMITMENT		RETURNED: PAROLE VIOLATION	
	#	%	#	%	#	%
2014 RELEASES						
TOTAL RETURNED	9,318	100.0%	2,079	100.0%	7,239	100.0%
1-6 MONTHS	2,252	24.2%	80	3.8%	2,172	30.0%
7-12 MONTHS	2,536	27.2%	333	16.0%	2,203	30.4%
13-18 MONTHS	1,736	18.6%	425	20.4%	1,311	18.1%
19-24 MONTHS	1,267	13.6%	462	22.2%	805	11.1%
25-30 MONTHS	889	9.5%	415	20.0%	474	6.5%
31-36 MONTHS	638	6.8%	364	17.5%	274	3.8%
MEDIAN # MONTHS	11.7		20.6		9.6	
1985-2014 RELEASES						
TOTAL RETURNED	294,760	100.0%	100,235	100.0%	194,525	100.0%
1-6 MONTHS	47,360	16.1%	6,951	6.9%	40,409	20.8%
7-12 MONTHS	83,321	28.3%	21,227	21.2%	62,094	31.9%
13-18 MONTHS	64,834	22.0%	23,516	23.5%	41,318	21.2%
19-24 MONTHS	45,497	15.4%	19,711	19.7%	25,786	13.3%
25-30 MONTHS	31,093	10.5%	15,883	15.8%	15,210	7.8%
31-36 MONTHS	22,655	7.7%	12,947	12.9%	9,708	5.0%
MEDIAN # MONTHS	13.8		18.0		11.9	

As shown in trend lines presented in **Figure 3**, the median time to return dropped substantially among parole violators between 1991 and 1999, and remained at just under 11 months until 2004, when it increased to 11.5 months. Between 2004 and 2007, the median time to return decreased among parole violators from 11.5 to 9.2 months. It remained steady from 2007 to 2013 at about 9.2 months with a slight increase for the 2010 cohort and for the 2014 release cohort. Time-to-return among new commitments has increased since the mid-1990s. The median time to return for new commitments increased from 15.7 months among the 1994 release cohort (shortest recorded) to 20.6 months among the 2014 release cohort (longest recorded).

Figure 3
Trends in Time to Return by Type of Return: 1985-2014

SECTION FOUR: RETURN RATES BY GENDER

Ninety-three percent of the 2014 releases were males (see **Table 4**). Since females tend to have a slightly shorter length of stay in DOCCS' custody, they are slightly overrepresented in the release cohort compared to an under custody population.⁸ Consistent with previous release cohorts, the rate of return for women offenders released in 2014 was substantially lower than the return rate for men (31% compared to 44%). For female offenders who returned to DOCCS' custody, 85% (375 out of 441) returned for parole violations and 15% (66 out of 441) returned for new offenses. For male offenders who returned to DOCCS' custody, 77% (6,864 out of 8,877) returned for parole violations and 23% (2,013 out of 8,877) returned for new crimes.

Return rates for the 1985-2014 cohort were similar to the 2014 release cohort; females had overall lower return rates than males (29% compared to 42%). For both females and males, the return rate for new commitments was higher for the 1985-2014 release cohort than for the 2014 release cohort.

Table 4
Returns to Custody by Gender:
Inmates Released in 2014 and 1985-2014

RELEASE TYPE AND RELEASE COHORT	TOTAL RELEASED		TOTAL RETURNED		RETURNED: NEW COMMITMENT		RETURNED: PAROLE VIOLATION	
	#	%	#	%	#	%	#	%
2014 RELEASES	21,816	100.0%	9,318	42.7%	2,079	9.5%	7,239	33.2%
MALES	20,375	93.4%	8,877	43.6%	2,013	9.9%	6,864	33.7%
FEMALES	1,441	6.6%	441	30.6%	66	4.6%	375	26.0%
1985-2014 RELEASES	709,404	100.0%	294,760	41.6%	100,235	14.1%	194,525	27.4%
MALES	660,948	93.2%	280,562	42.4%	96,430	14.6%	184,132	27.9%
FEMALES	48,456	6.8%	14,198	29.3%	3,805	7.9%	10,393	21.4%

Returns by gender for individual year cohorts are presented in **Appendix B**.

On the next page, the trends are illustrated graphically. Since the early 1990s, parole violator returns have generally been increasing, while new felony returns have generally been declining. The total return rate among both males and females increased slightly among the 2014 release cohort. This was mostly due to the increase in the returns for new felony conviction. The new felony return rate among males increased slightly from 9% among 2013 releases to 10% for the 2014 cohort. Among females, the return rate for new felonies also increased between 2013 and 2014 (4% to 5%).

⁸ On December 31, 2014, 96% of the offenders under custody were male and 4% were female.

Figure 4.1
Return Rates among Male Releases: 1985-2014

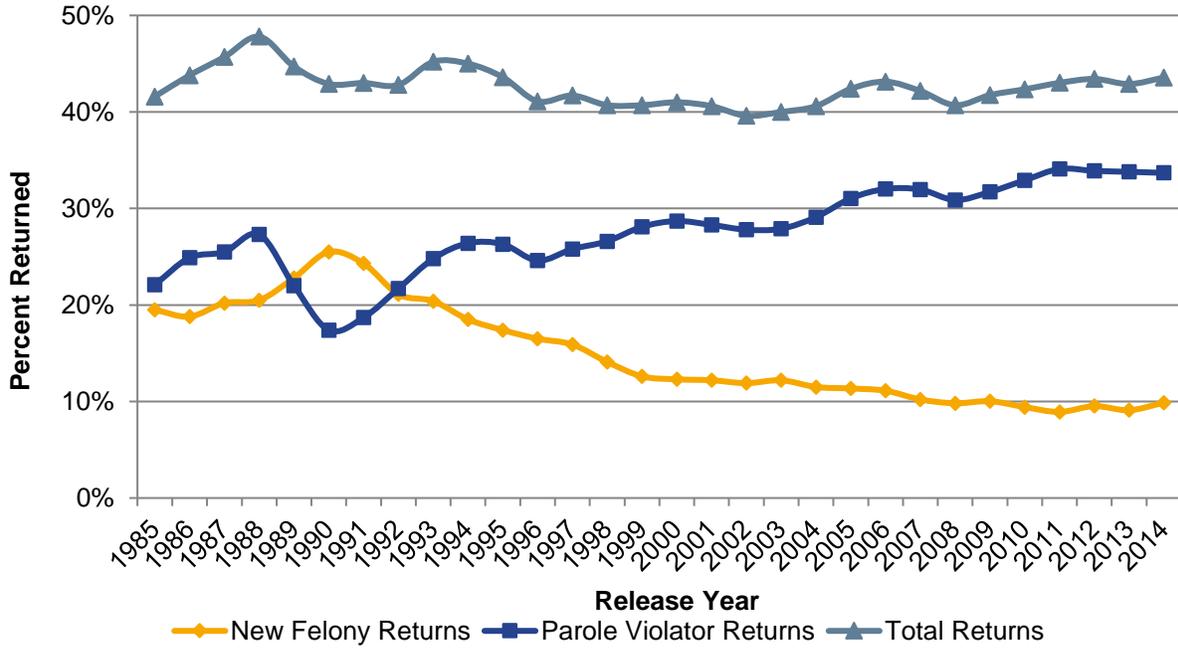

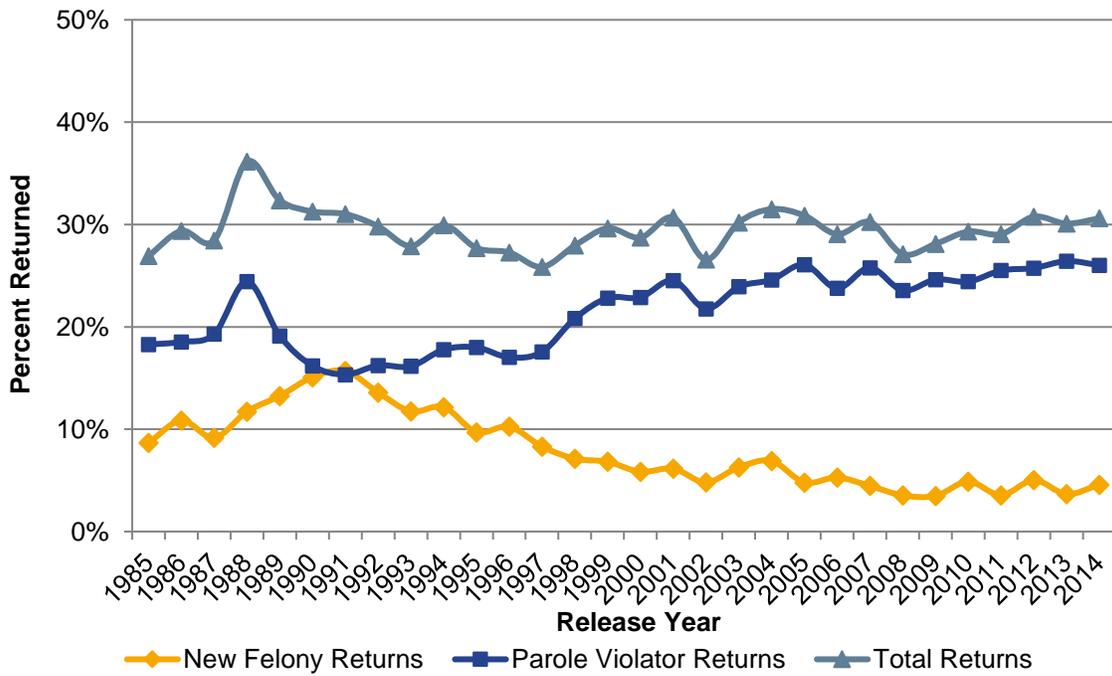

Figure 4.2
Return Rates among Female Releases: 1985-2014

SECTION FIVE: RETURN RATES BY RELEASE CRIME

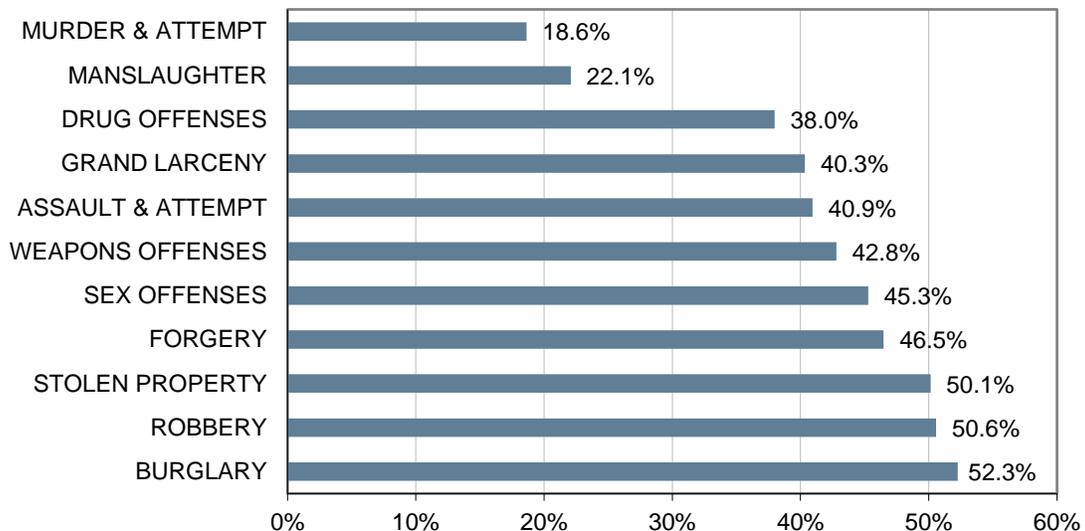

Table 5 presents data on the most serious commitment crime⁹ for releases in the 2014 cohort. Crimes are broken out by major crime categories. Violent Felony Offenses (VFO's) include legislatively-designated violent crimes that invoke certain sentencing mandates and Class A crimes. Other violent or coercive crimes are included under the heading Other Coercive Offenses. Additional major categories include Drug Offenses, Property and Other Offenses, and two headings that denote legal status for young people, Youthful Offenders and Juvenile Offenders.

The total return rates were 45% for Violent Felony offenders, 42% for Other Coercive offenders, 38% for Drug offenders, 43% for Property and Other offenders, 48% for Youthful Offenders, and 41% for Juvenile Offenders.

Among individual crime categories, there were marked differences in the rates of return. Individuals convicted of offenses such as burglary and robbery tended to have the highest rates of return, with about half returning within three years of release. More specifically, the highest rates of return were observed for Burglary 2nd (55%), Robbery 2nd (54%), Other VFO Sex Offenses (52%), Burglary 3rd (51%), and Other Violent Felony (51%). Offenders least likely to return within three years were convicted of Murder (13%), Criminally Negligent Homicide (13%), and Manslaughter 2nd (21%). Results for the 1985-2014 cohort can be observed in **Appendix C**. Results for the individual release cohorts between 1985 and 2014 are presented in **Appendix D**.

Figure 5.1 presents return rates for selected groupings of crime categories. While offenders with crimes such as burglary, robbery, and stolen property offenses had the highest return rates, offenders released after serving time for murder and manslaughter returned at the lowest rates.

Figure 5.1
Return Rates for Selected Crimes: 2014 Releases

⁹ "Most serious commitment crime" is determined by the crime with the longest maximum sentence.

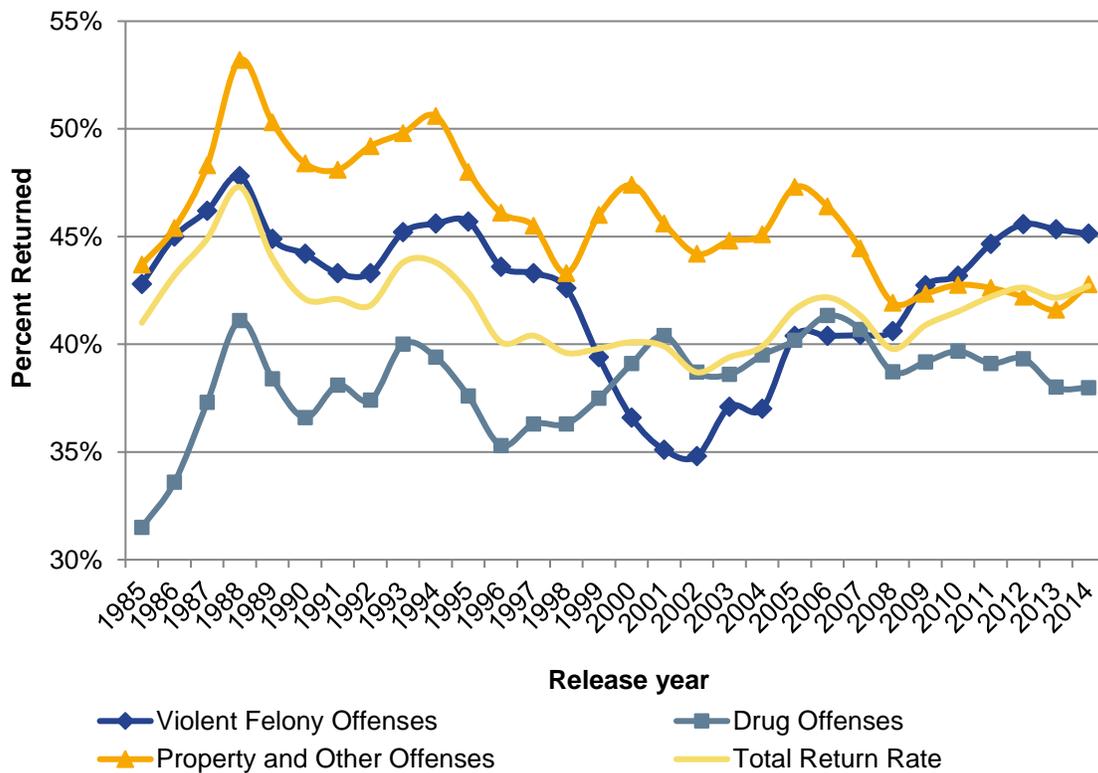

Table 5
2014 Releases: Most Serious Crime at Commitment by Return Type

MOST SERIOUS CRIME AT COMMITMENT	TOTAL RELEASED	TOTAL RETURNED		RETURNED: NEW COMMITMENT		RETURNED: PAROLE VIOLATOR	
TOTAL	21,816	9,318	42.7%	2,079	9.5%	7,239	33.2%
VIOLENT FELONY	8,914	4,023	45.1%	727	8.2%	3,296	37.0%

Figure 5.2 shows trends in total return rates of the annual release cohorts between 1985 and 2014, for select major crime categories and overall. Property and Other offenders consistently returned at a higher rate than offenders in the other crime categories until 2009. The return rate for Violent Felony Offenders (VFOs) decreased in the late 1990s and early 2000s and has increased since 2002. Since the 2011 release cohorts, the return rate for VFOs was higher than the return rate for Property and Other offenders.

Between 1996 and 2006, the return rates for drug offenders generally increased (with slight decreases in 2002 and 2003). While drug offenders returned at a lower rate than the other crime categories, their return rate exceeded the rate for violent felony offenders between 2000 and 2004. The return rate for drug offenders peaked in the 2006 release year and generally decreased thereafter. Beginning with the 2008 release cohort, drug offenders showed the lowest return rates among all crime categories.

Figure 5.2
Trends in Return Rates by Select Crime Categories: 1985-2014

Figures 5.3 and **5.4** illustrate some differences in return trends based on type of return. New commitment returns generally declined for every type of offender since 1990. The new commitment return rates reached their lowest point in 2011, and has varied slightly since, with a slight increase in 2014. Parole violation return rates have generally increased since 1990. The parole violation return rate among violent offenders increased from the lowest return rate crime category in the early 2000s to the highest return rate crime category beginning in 2008. The parole violation return rate among violent offenders increased slightly from 38% among 2013 releases to 37% for the 2014 cohort.

Figure 5.3
Trends in New Commitment Returns by Select Crime Categories: 1985-2014

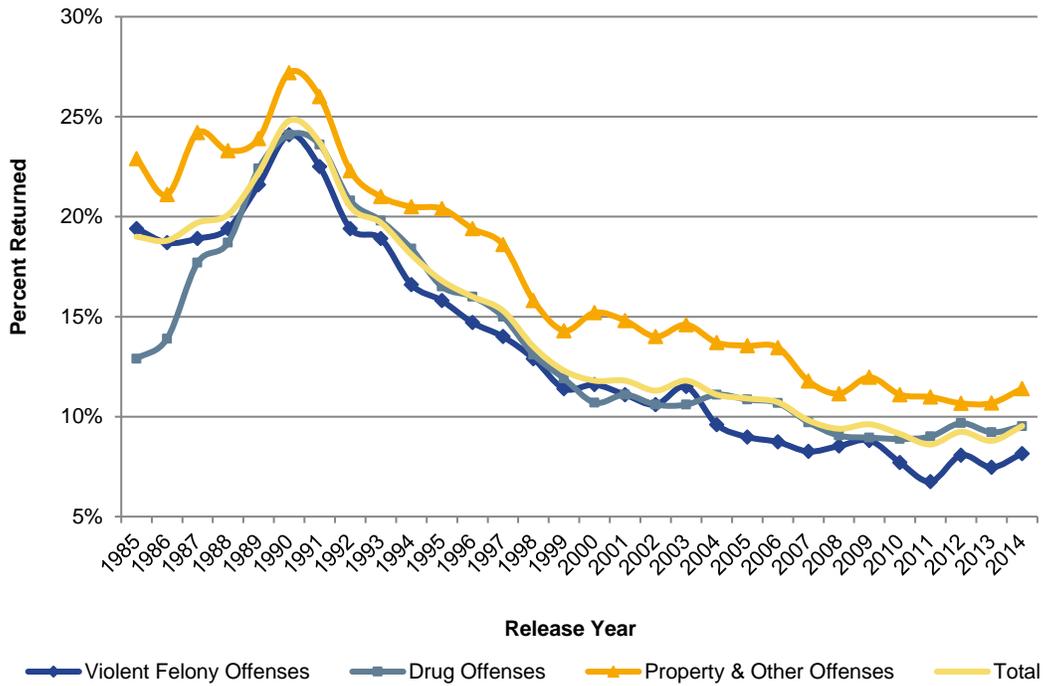

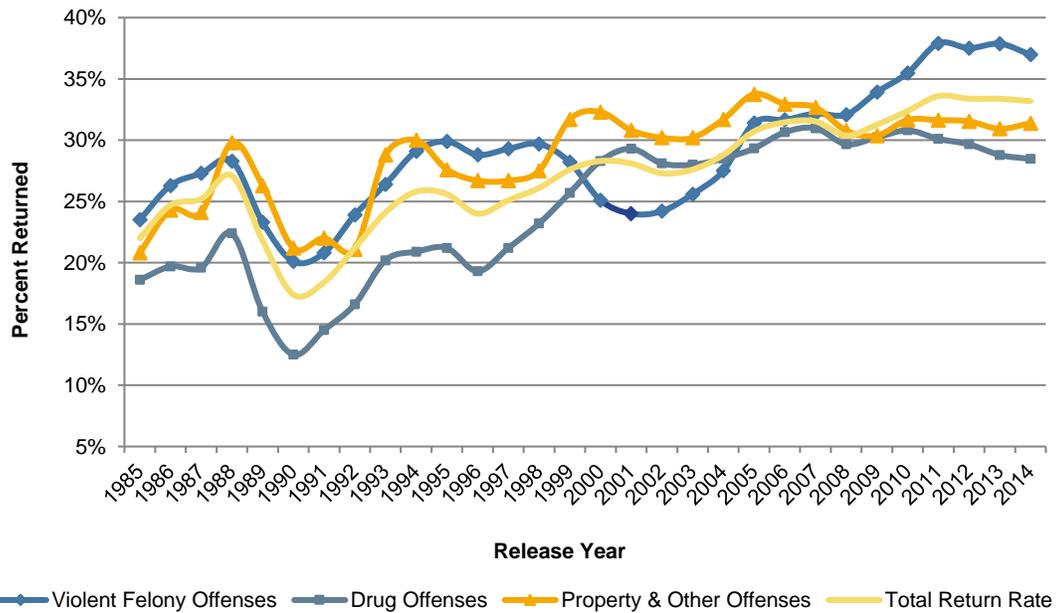

Figure 5.4
Trends in Parole Violation Returns by Select Crime Categories: 1985-2014

SECTION SIX: READMISSION CRIMES

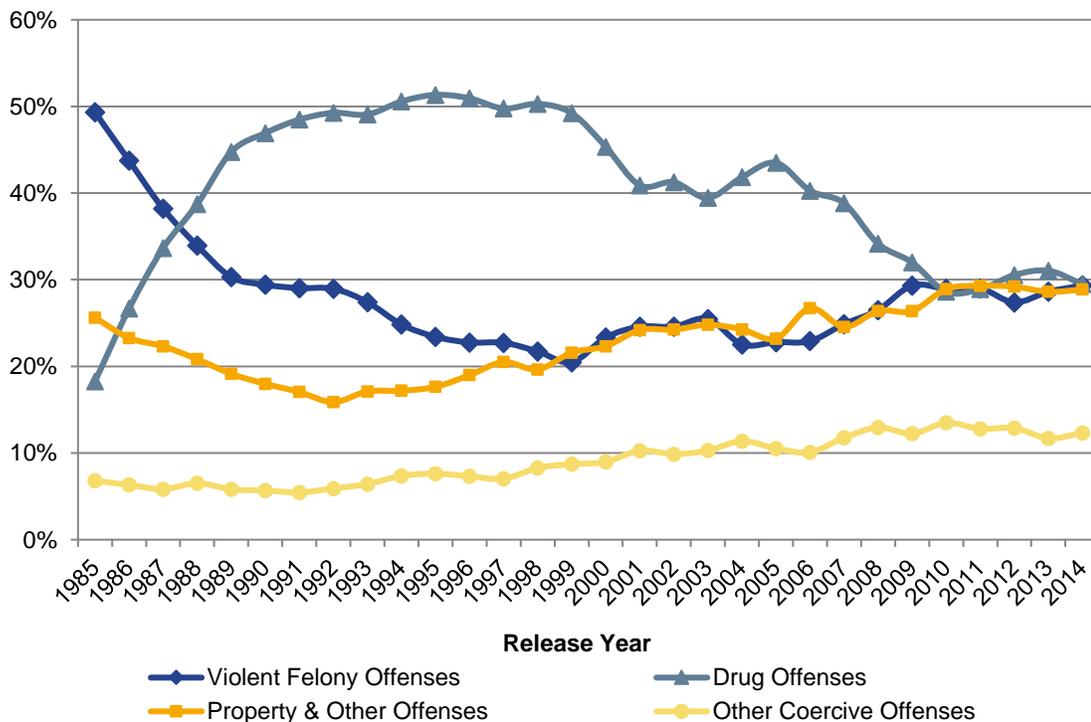

Among the 21,816 offenders in the 2014 release cohort, 2,079 (9.5%) were returned to DOCCS' custody within three years of release following conviction for a new felony offense. **Figure 6** and **Table 6** present the crimes for which these offenders were returned to DOCCS' custody. Twenty-nine percent of the 2014 releases who returned within three years for new felony convictions were convicted of drug offenses, 29% were returned for property or other offenses, 29% were returned for violent felony offenses, and 12% were returned for other coercive offenses.

Table 6 also shows new commitment returns for the combined 1985-2014 release cohort. The combined release cohort most often returned for drug offenses (42%), although the return rate for drug offenses has decreased since the 1990s (see **Figure 6**). The return rate for violent felonies decreased until 1999 and increased moderately since then (29% in 2014).

The gap between the proportion of offenders returned for committing drug offenses and the proportion returned for violent offenses narrowed significantly since the mid-1990s. Among 1995 releases, 51% returned for drug offenses and 23% returned for violent offenses. Among 2014 releases, the return rate for drug offenses was 29% and violent offenses was 29%. The return rate for committing other coercive offenses remained the lowest among the different crime types.

Appendices E.1 and E.2 show return crimes by release crimes for the 2014 and 1985-2014 cohorts.

SECTION SEVEN: RETURN RATES BY AGE AT RELEASE

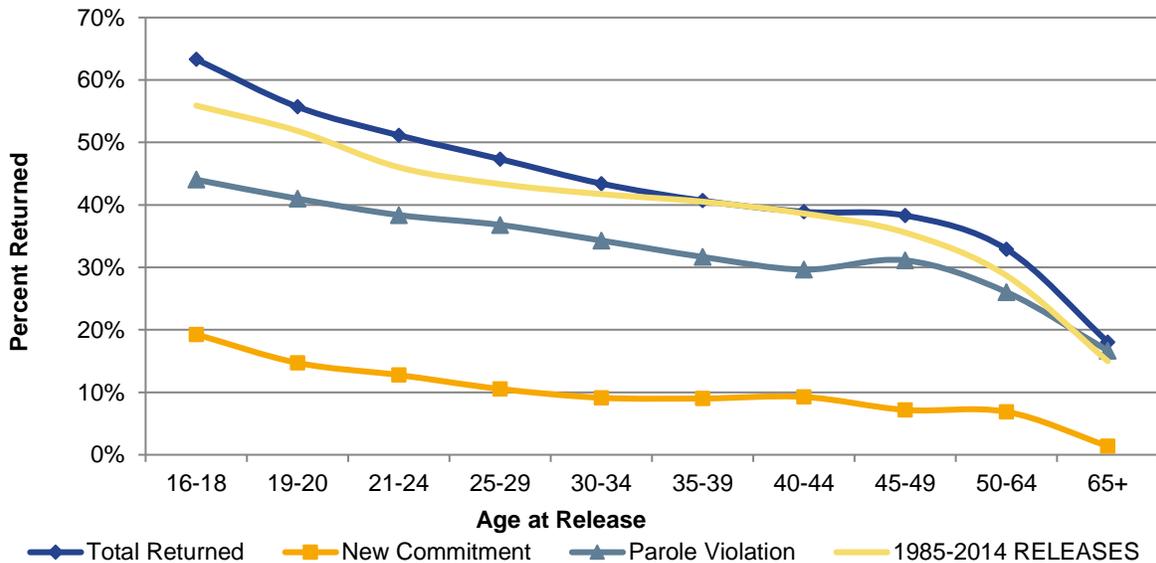

The relationship between return rates and age at time of release is illustrated in **Figure 7** and **Table 7.1**.¹⁰ Since 1985, the average age of releases increased, from 29 among 1985 releases, to 36 among 2014 releases.

Among 2014 releases, 57% of the offenders who were under 21 when released returned to DOCCS' custody within three years, while 42% of those 21 years old or older returned to DOCCS' custody (see **Table 7.1**). Generally, return rates declined as age at release increased, with one exception—similar to recent release cohorts, return rates slightly increased for offenders in their mid- to late-forties returned for parole violations.

The data for the aggregate 1985-2014 cohort shows a steady decline in return rate as the age at release increases. **Appendix F** presents return rates by age at release for the individual 1985-2014 release cohorts.

Table 7.2 shows new commitment returns for the 2014 release cohort by age group. Offenders age 50 or older returned to prison for committing a new crime were most likely to return for committing non-violent Property and Other crimes (47% or 94 out of 202). The highest return rate for offenders under age 50 was among Drug Offenders (30%) followed by Violent Felony Offenders (30%) and Property and Other crimes (27%).

Figure 7
2014 Return Rates by Age at Release

¹⁰ Of the 2014 release cohort, 4% were under 21. This is comparable to the composition of inmates under custody as of December 31, 2014, when 4% of the inmates were under 21.

SECTION EIGHT: RETURN RATES BY ETHNICITY

The ethnic distribution of the 2014 and 1985-2014 release cohorts is presented below in **Table 8**. Of the 2014 releases, 47% were African-American, 28% were White, and 23% were Hispanic. These percentages are similar to those of the under custody offender population at the end of 2014.¹¹

The highest return rate among the 2014 cohort was found for African-American offenders (46%); 43% of the White and 37% of the Hispanic offenders returned. Among the 1985-2014 aggregate cohort, the return rate was the highest for African-American releases (46%), followed by Whites (38%) and Hispanics (38%). While the return rate among African-American offenders has been relatively stable since 1985, the rate among White offenders has increased and the rate among Hispanic offenders has decreased. (See **Appendix G** for data on ethnicity for individual years.)

SECTION NINE: RETURN RATES BY CRIMINAL HISTORY

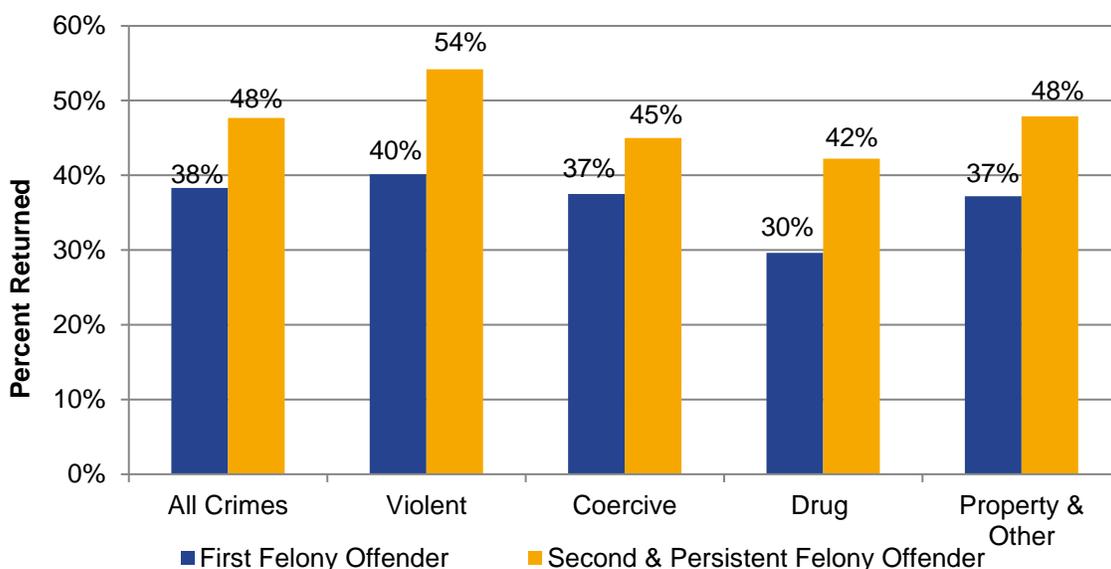

PREDICATE FELONY OFFENDERS

Since 1973, New York State law has provided more severe penalties for a person convicted as a second felony offender. The basic provisions of the second felony offender law mandated an indeterminate prison sentence with a minimum term equal to one-half of the maximum (compared to a limit of one-third the maximum for first felony offenders). In 1995, the New York State Legislature passed the Sentencing Reform Act, which increased the minimum sentence length for first-time violent felons from one-third to one-half of the maximum sentence and imposed a determinate sentencing structure for repeat violent felons. In 1998, the Legislature extended the determinate sentencing to first felony violent offenders and added a period of post-release supervision for violent offenders ranging from one to five years. In 2004, the Legislature again extended determinate sentencing to drug offenders.

Approximately 47% of the 2014 releases were originally sentenced as second felony offenders. Second felony offenders in the 2014 cohort had a higher return rate (48%) than first felony offenders (38%), both overall and within all four crime categories.

Below, **Figure 9** summarizes return data for broad crime categories by felony offender status. More detailed crime information is presented in **Table 9.1** on the following page. The highest rate of return for second felony offenders was found for offenders who committed Violent Felony Offenses (54%). Among first felony offenders, the highest rate of return was found for Youthful Offenders (48%).¹² As shown in **Appendix H**, these patterns held true for the aggregate data.

Figure 9
Return Rates by Felony Offender Status and Crime Category, 2014 Releases

¹² Youthful Offenders can only be sentenced as first felony offenders.

PRIOR FELONY CONVICTIONS

Table 9.2 presents return rates among offenders with varying numbers of prior felony convictions accumulated before they were admitted to DOCCS' custody for the current offense. Among 2014 releases, the return rate increased as the number of prior felony convictions increased. The pattern of more experienced offenders returning at a greater rate than less experienced offenders applied to both new commitment and technical violation returns. In the 2014 release year, about half (48%) of the releases with four or more prior felony convictions returned within three years, compared to about one-third (39%) of those with no prior conviction.

Table 9.2
2014 Releases: Number of Prior Felony Convictions by Type of Return

SECTION TEN: RETURN RATES BY FIRST OR PREVIOUS RELEASE

Table 10 presents a breakdown of inmates who were first releases and inmates who had prior releases on their sentences for 2014 and 1985-2014 aggregate release cohorts.¹³ In the 2014 release year, 62% of inmates were first releases to the community, and 38% had been previously released from DOCCS. As shown in the table, inmates who had no prior releases on their sentence were less likely to return than offenders who had been previously released and returned (37% vs. 52%). These differences held for both new commitment and technical violation returns, and for the 1985-2014 releases.

Table 10
Returns among First and Previous Releases
Inmates Released in 2014 and 1985-2014

RELEASE STATUS	TOTAL RELEASED		TOTAL RETURNED	RETURNED:	
	#	%		NEW COMMITMENT	PAROLE VIOLATION
2014 RELEASES	21,816	100.0%	9,318	2,079	7,239
% (return/release)			42.7%	9.5%	33.2%
FIRST RELEASE	13,465	61.7%	4,994	1,069	3,925
% (return/release)			37.1%	7.9%	29.1%
PREVIOUS RELEASE	8,351	38.3%	4,324	1,010	3,314
% (return/release)			51.8%	12.1%	39.7%
1985-2014 RELEASES	709,404	100.0%	294,760	100,235	194,525
% (return/release)			41.6%	14.1%	27.4%
FIRST RELEASE	479,179	67.5%	180,040	61,509	118,531
% (return/release)			37.6%	12.8%	24.7%
PREVIOUS RELEASE	230,225	32.5%	114,720	38,726	75,994
% (return/release)			49.8%	16.8%	33.0%

Trends in returns by prior release are shown in **Figure 10.1**, **Figure 10.2**, and **Figure 10.3**. The difference in return rates between first and previous releases has been consistent for new commitment returns over time. However, the gap in parole violation returns between first and previous releases widened considerably beginning with the 1992 cohort. The annual rates are presented in **Appendix I**.

¹³ In this section, only prior releases on the sentence for which the inmate was under custody are considered; previous sentences and their corresponding releases, if any, are not included in the determination.

Figure 10.1
Total Return Rates among First and Previous Releases, 1985-2014

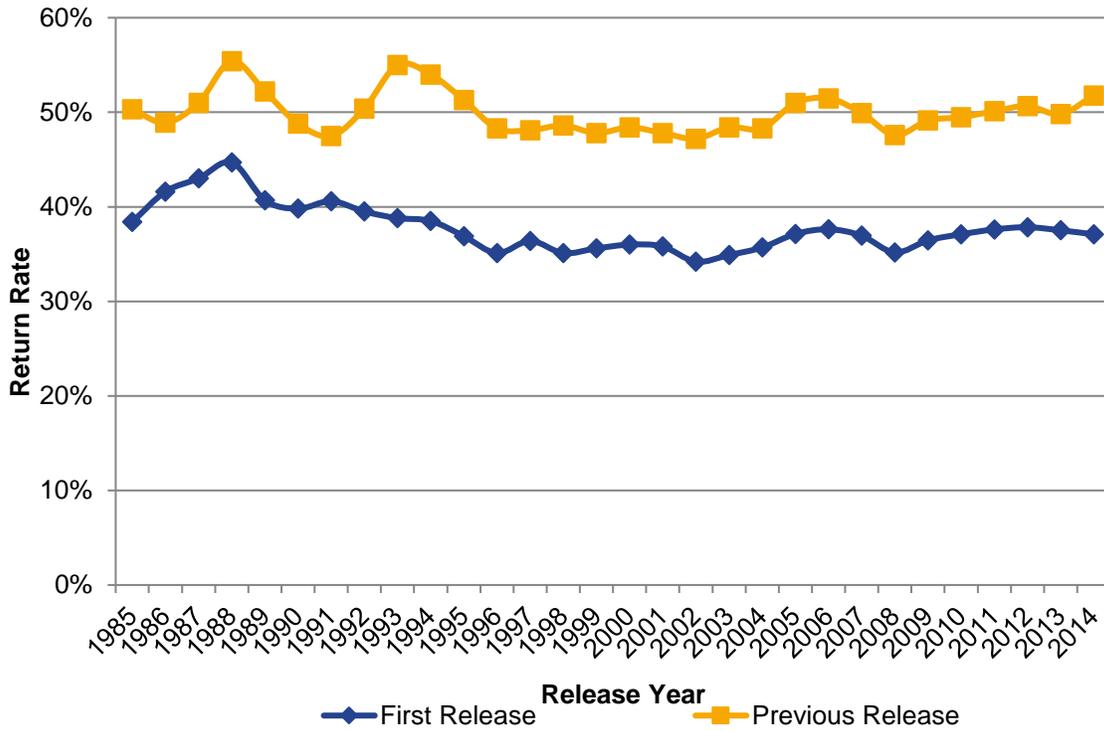

Figure 10.2
Parole Violation Return Rates among First and Previous Releases, 1985-2014

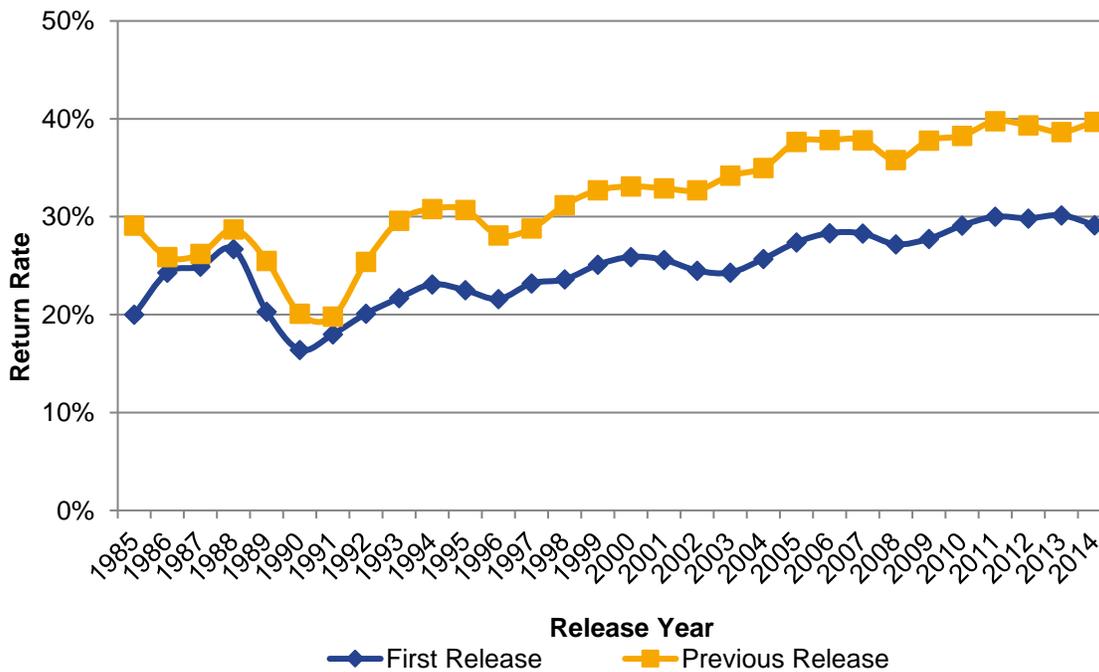

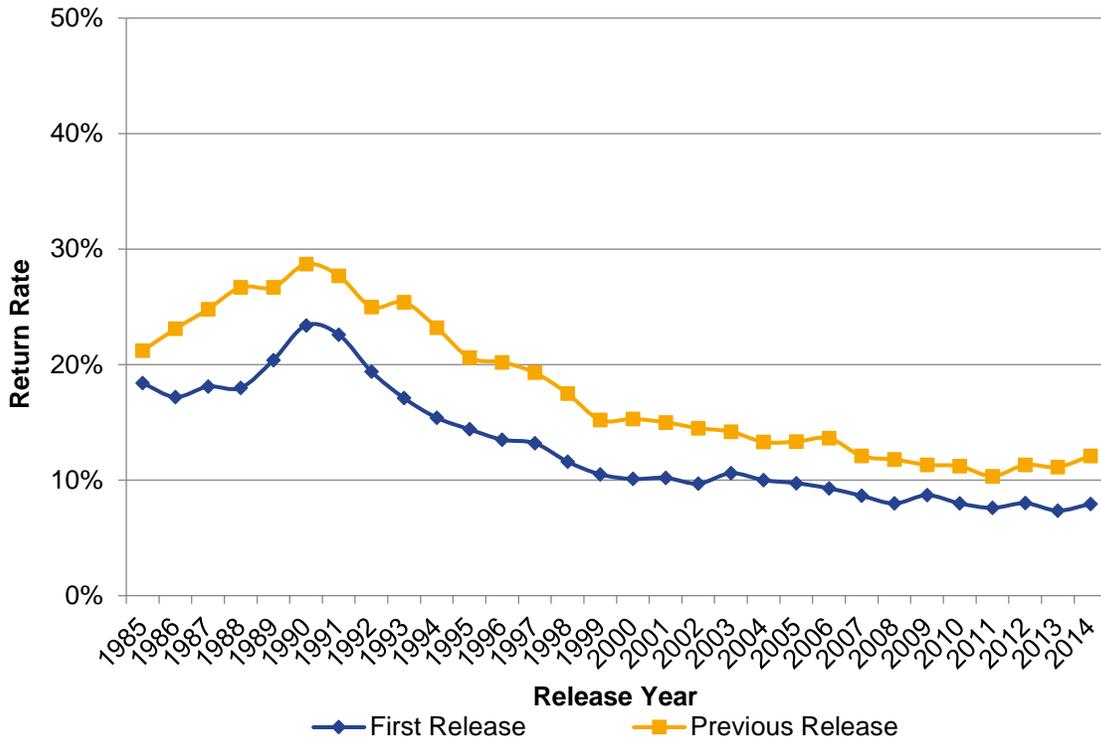

Figure 10.3
New Commitment Return Rates among First and Previous Releases, 1985-2014

SECTION ELEVEN: RETURN RATES BY REGION

Almost half (43%) of the 2014 study population was originally committed from one of the five counties of New York City (9,397 out of 21,816). Upstate Urban counties accounted for an additional 22%; 11% were committed from Suburban New York City counties, and the remaining 23% were committed from other areas of the state.

Among the 2014 releases, offenders from Upstate Urban counties had the highest return rate. Overall, 51% of the releases committed from Upstate Urban counties returned, compared to 46% of those from non-urban upstate (“Other New York State”) counties, 41% of releases from Suburban New York City, and 37% of the releases from New York City.

New conviction rates varied narrowly among the regional groupings: 11% of those from Upstate Urban counties returned for new felonies as did 9% of releases committed from New York City, 9% of the releases from Other New York State counties, and 8% of commitments from Suburban New York City counties. Commitment counties with the lowest new conviction return rates include Rockland (5%) and Westchester (6%). Three counties in the Upstate Urban region (Albany, Rensselaer, and Schenectady) shared the highest new conviction return rate of 13%.

Most of the Upstate Urban counties also had relatively high parole violation return rates, with an overall violator return rate of 40%, compared to 37% for Other New York State counties, 33% among the releases committed from Suburban New York City, and 28% for releases from New York City. Commitment counties with the highest violator return rates included Monroe (44%), Schenectady (42%), and Broome (41%), which are all Upstate Urban counties.

Trends in three-year return rates observed for the annual release cohorts differ by type of return and region, as presented in **Figures 11.1 - 11.4**. As shown in **Figure 11.1**, parole violator return rates among New York City commitments increased dramatically in the 1990’s, almost doubling over the time period, while new commitment return rates had an equally dramatic drop. The total return rate has remained at around 40% over the last fifteen years.

Among Suburban New York City counties, the return rate for parole violations increased since the late 1990’s, with a sharp increase since 2008, while the rate for new commitments generally decreased. In Upstate Urban counties, the return rates for parole violations increased over the last ten years, while new commitment return rates decreased slightly. Among Other New York State counties, in the last ten years, the return rates for parole violations increased slightly, while the new commitment return rates decreased slightly. Among Upstate Urban releases, the gap between parole violator returns and new commitment returns increased sharply between 2009 and 2014 (see **Figures 11.2, 11.3** and **11.4**).

SECTION TWELVE: RETURNS OF DRUG OFFENDERS

Table 12 presents return rates by release type and felony class¹⁴ for offenders originally committed for a drug offense. Overall, 38% of the 4,841 drug felons released in 2014 returned to DOCCS' custody within three years, including 28% as parole violators and 10% with new convictions.

Fifty-five percent of the drug offenders released in 2014 were convicted of drug sales; 45% were in DOCCS' custody for drug possession convictions. Offenders convicted of drug sales were more likely to return than those convicted of possession (40% compared to 35%). These differences were attributed to higher levels of parole violation returns among offenders convicted of drug sales (31% compared to the rates among those in DOCCS' custody for possession (25%). The new felony return rate was slightly higher for those in DOCCS' custody for drug possession convictions (10%) than for drug sale convictions (9%). The trends in the return rates of drug offenders were presented in Section Five.

There was considerable variation in the return rates between drug felony classes; A-I and A-II drug felons returned at much lower rates than offenders convicted of less serious drug offenses. This may be a function of the fact that these serious drug felons spent more time incarcerated due to longer sentences and almost 70% of them were first releases.¹⁵ Among the 1985-2014 drug release cohort, new felony returns were generally higher than were found for the 2014 cohort (14% compared to 10%) and returns for parole violations were lower (25% compared to 28%).

¹⁴ New York grades felonies into classes ranging from the most serious, Class A-1, to the least serious, Class E. Sentence length is usually related to offense class.

¹⁵ See Section Ten for discussions of return rates by first/previous releases.

SECTION THIRTEEN: RETURN RATES OF VETERANS

Table 13 presents a breakdown of inmates who were identified as verified veterans of the United States Armed Forces and inmates considered nonveterans. Verified veterans comprised only three percent of all 2014 releases, but they returned to prison at lower rates (35%) than nonveterans (43%). This difference in return rates held for both new commitment and technical violation returns.

Table 13
Returns Among Verified Veteran and Nonveteran Releases

VETERAN STATUS	TOTAL RELEASED		TOTAL RETURNED	RETURNED:	
	#	%		NEW COMMITMENT	PAROLE VIOLATION
2014 RELEASES	21,816	100.0%	9,318	2,079	7,239
<i>% (return/release)</i>			<i>42.7%</i>	<i>9.5%</i>	<i>33.2%</i>
VERIFIED VETERANS	724	3.3%	251	38	213
<i>% (return/release)</i>			<i>34.7%</i>	<i>5.2%</i>	<i>29.4%</i>
NONVETERANS	21,092	96.7%	9,067	2,041	7,026
<i>% (return/release)</i>			<i>43.0%</i>	<i>9.7%</i>	<i>33.3%</i>

SECTION FOURTEEN: RETURN RATES BY TOTAL (STATE + JAIL) TIME SERVED

The average “total time served” (i.e., state time plus jail time) for the 2014 release cohort was 36.4 months and the median was 22.0 months. The average “state time only” for the 2014 release cohort was 28.7 months and the median was 13.4 months.

The return rates by total time served are presented in **Table 14**. Those 2014 releases with total time served of 12-17 months had the highest return rates (47%) while those with total time served of 240 or more months had the lowest return rates (12%). Generally, as the total time served increased, the return rate decreased.

For new commitment returns, the highest return rate of 11% occurred among those who served the least amount of total time (less than 18 months) while those who served the longest total time (240 or more months) had the lowest return rates (1%). Return rates for new felony convictions generally declined with the amount of total time served, with the exception of increases occurring with those who served 24-35 months and 36-47 months. This pattern also generally held for returns for parole violations with the highest return rate occurring among those who served 18-23 months of total time (37%) and the lowest rate (11%) among those who served 240 or more months.

Table 14
Return Rates by Total (State + Jail) Time Served for 2014 Releases

TOTAL (STATE + JAIL) TIME SERVED	TOTAL RELEASED		TOTAL RETURNED	RETURNED:	
	#	%		NEW COMMITMENT	PAROLE VIOLATION
2014 RELEASES	21,816	100.0%	9,318	2,079	7,239
% (return/release)			42.7%	9.5%	33.2%
LESS THAN 12 MONTHS	4,538	20.8%	1,943	496	1,447
% (return/release)			42.8%	10.9%	31.9%
12 - 17 MONTHS	4,051	18.6%	1,917	438	1,479
% (return/release)			47.3%	10.8%	36.5%
18 - 23 MONTHS	4,025	18.4%	1,857	358	1,499
% (return/release)			46.1%	8.9%	37.2%
24 - 35 MONTHS	3,763	17.2%	1,573	348	1,225
% (return/release)			41.8%	9.2%	32.6%
36 - 47 MONTHS	1,507	6.9%	677	155	522

48 - 71 MONTHS	1,864	49.5%	750	166	584
% (return/release)			40.2%	8.9%	31.3%
72 - 119 MONTHS	1,025	27.2%	383	82	301
% (return/release)			37.4%	8.0%	29.4%
120 - 179 MONTHS	441	11.0%	126	23	103
% (return/release)			28.6%	5.2%	23.4%
180 - 239 MONTHS	247	6.6%	49	8	41
% (return/release)			19.8%	3.2%	16.6%
240 OR MORE MONTHS	355	9.4%	43	5	38
% (return/release)			12.1%	1.4%	10.7%

**SECTION FIFTEEN:
RETURN RATES BY COMPAS SUPERVISION LEVEL**

The COMPAS Supervision model of Community Supervision was implemented in January 2012. The four supervision levels and the accompanying ratios (25:1, 40:1, 80:1, and 160:1) and reporting requirements were determined based on a number of risk factors, including risk of absconding, risk of any arrest, and risk of Violent Felony arrest. Individuals determined by the Article 10 process to require Strict and Intensive Supervision and Treatment (SIST) are supervised at a 10:1 ratio and are included in the Level 1 category. Other sex offenders and discretionary mental health cases are also supervised at Level 1.

Table 15 presents a breakdown of inmates released to Community Supervision by the first known COMPAS Supervision Level at release. Those who did not have a COMPAS assessment conducted at the time of release were considered pending.

For 2014 inmates released to Community Supervision, the overall return rate was 45%. Those supervised at the highest level (Level 1) were returned at the highest rate and those supervised at the lowest level (Level 4) had the lowest return rate: 60% of inmates released as Supervision Level 1 offenders were returned within three years compared with 19% of Level 4 offenders. This finding was consistent for returns as new commitments and for returns for parole violations.

**Table 15
Return Rates by COMPAS Supervision Level**

COMPAS LEVEL	TOTAL RELEASED		TOTAL RETURNED	RETURNED:		RETURNED:	
	#	%		NEW COMMITMENT	PAROLE VIOLATION		
2014 RELEASES	19,514	100.0%	8,861	1,640	7,221		
% (return/release)			45.4%				
Level 1	6,117	31.3%	3,668	608	3,060	8.4%	37.0%
% (return/release)			60.0%			9.9%	50.0%
Level 2	4,476	22.9%	2,394	416	1,978	9.3%	44.2%
% (return/release)			53.5%			9.3%	44.2%
Level 3	5,178	26.5%	2,077	442	1,635	8.5%	31.6%
% (return/release)			40.1%			8.5%	31.6%
Level 4	3,678	18.8%	706	169	537	4.6%	14.6%
% (return/release)			19.2%			4.6%	14.6%
Pending	65	0.3%	16	5	11	7.7%	16.9%
% (return/release)			24.6%			7.7%	16.9%

Note: 50 Releases to Community Supervision for whom an exact match between COMPAS data and release data was not found were excluded from this table.

SECTION SIXTEEN: RETURN RATES FOR SUBSEQUENT RELEASE COHORTS

Releases from 2015 and 2016 were followed so that more current trends in return rates could be examined. The 2015 releases were followed for two years, and the 2016 releases were followed for a one year period. The outcomes of these partial follow-ups are compared to the 2014 releases and presented in **Table 16**.

Compared to 2014, the percentage of offenders who returned within 12 months after release was slightly higher for the 2015 release cohort and about the same for the 2016 release cohort. The return rate for the both the 2014 and 2016 release cohorts was 22%, compared with 23% for the 2015 release cohort. The return rate was stable for new commitments (2%), but the return rate for parole violations was slightly higher for the 2015 release cohort (21%) compared with the 2014 and 2016 release cohorts (20%).

The percentage of offenders who returned within 24 months of release also remained the same at 36% among the 2014 and 2015 release cohorts. Finally, the return rates were the same for new commitment returns (6%) and parole violations (30%) among 2014 and 2015 releases.

Table 16
